Performance Disclosures

Logan Circle Partners, L.P. has prepared and presented this report in compliance with the Global Investment Performance Standards (“GIPS®”). The Firm’s compliance with the GIPS standards has been verified for the period November 1, 2007 through December 31, 2008 by Ashland Partners & Company LLP. Additional information regarding the Firm’s policies and procedures for calculating and reporting performance returns is available upon request. The Long Credit Fixed Income Composite seeks to generate consistent total return by investing in fixed income securities across the government, corporate and structured markets. The composite contains fully discretionary, fee-paying fixed income accounts according to the applicable composite strategy. The Firm maintains a complete list and description of composites which are available upon request. The benchmark for the Long Credit Fixed Income Composite is the Barclays Long Credit Index, which measures the performance of a large group of high quality corporate and government bonds with maturities greater than ten years. All index returns presented are provided to represent the investment environment existing during the time periods shown and will not be covered by the future report of independent verifiers. For comparison purposes, the indices are fully invested and include the reinvestment of income. The indices are unmanaged and unavailable for direct investment. The returns for the indices do not include any transaction costs, management fees or other costs. Investors cannot purchase interests directly in an index. The dispersion of annual returns is measured by the standard deviation among asset-weighted portfolio returns represented within the composite for the full year. Dispersion is not calculated for composites with less than five accounts for the whole period. Derivatives may make up a part of the composite strategy as Logan believes that derivatives offer value and are appropriate investments for client mandates. The Firm may utilize U.S. Treasury derivatives such as futures to assist in the management of our portfolios. Derivative usage is governed by the appropriate level of risk to meet the return targets rather than for speculative purposes. Past performance is not indicative of future results. The information presented is available for institutional client use only.

In general. This disclaimer applies to this document and the verbal or written comments of any person presenting it. This document, taken together with any such verbal or written comments, is referred to herein as the "Presentation." Logan Circle Partners, L.P., a Fortress Investment Group LLC company, is referred to herein as "Logan Circle."

No offer to purchase or sell securities. This Presentation does not constitute an offer to sell or a solicitation of an offer to buy any security and may not be relied upon in connection with the purchase or sale of any security.

Projections. Projections contained in this Presentation are based on a variety of estimates and assumptions by Logan Circle, including, among others, estimates of future operating results, the value of assets and market conditions at the time of disposition, and the timing and manner of disposition or other realization events. These estimates and assumptions are inherently uncertain and are subject to numerous business, industry, market, regulatory, competitive and financial risks that are outside of Logan Circle's control. There can be no assurance that the assumptions made in connection with the projections will prove accurate, and actual results may differ materially, including the possibility that an investor may lose some or all of its invested capital. The inclusion of the projections herein should not be regarded as an indication that Logan Circle or any of its affiliates considers the projections to be a reliable prediction of future events and the projections should not be relied upon as such. Neither Logan Circle nor any of its affiliates or representatives has made or makes any representation to any person regarding the projections and none of them intends to update or otherwise revise the projections to reflect circumstances existing after the date when made or to reflect the occurrence of future events, if any or all of the assumptions underlying the projections are later shown to be in error. For purposes of this paragraph, the term "projections" includes "targeted returns".

Past performance. Past performance is not a reliable indicator of future results and should not be relied upon as the basis for making decision. The information presented is available for institutional client use only and presented as a one-on-one presentation.

Gross vs. Net Performance returns are presented gross and net of fees, include the reinvestment of all income and are calculated in U.S. dollars. Dividend income has been recorded net of all applicable foreign withholding taxes. Gross-of-fees does not reflect the deduction of our investment management fees. Individual client returns will be reduced by investment management fees and other expenses that the account may incur. The investment management fee schedule for the composite is 0.40% on the first \$25 million, 0.35% on amounts from \$25 million to \$100 million and 0.30% on the remainder. Fees have a compounding effect on cumulative results. For example, if a 1% investment advisory fee were deducted annually from an account that achieves a 10% gross annualized return, the net return would be approximately 8.9% after the deduction of advisory fees. Investment advisory fees are described in Part II of Form ADV. Actual investment advisory fees incurred by clients may vary.
