Performance Disclosures

Logan Circle Partners, L.P. has prepared and presented this report in compliance with the Global Investment Performance Standards ("GIPS®"). The Long Duration Fixed Income Composite received a performance exam by Ernst & Young from the inception date until December 2006 while at the predecessor firm. The Firm's compliance with the GIPS standards has been verified for the period November 1, 2007 through December 31, 2008 by Ashland Partners & Company LLP. In addition, the composite has received a performance exam beginning November 1, 2008. Additional information regarding the Firm's policies and procedures for calculating and reporting performance returns is available upon request. The Long Duration Fixed Income Composite seeks to generate consistent total return by investing in fixed income securities across the government, corporate and structured markets. The composite contains fully discretionary, fee-paying fixed income accounts according to the applicable composite strategy. The Firm maintains a complete list and description of composites which are available upon request. The benchmark from inception to April, 30, 2007 was the Barclays U.S. Long Credit Index, and from May 1, 2007 to the present, the benchmark has been and remains the Barclays U.S. Long Government Credit Index, which measures the performance of a large group of high quality corporate and government bonds with maturities greater than ten years. The index was changed as the Barclays U.S. Long Government Credit Index is more representative of the strategy. All index returns presented are provided to represent the investment environment existing during the time periods shown and will not be covered by the future report of independent verifiers. For comparison purposes, the indices are fully invested and include the reinvestment of income. The indices are unmanaged and unavailable for direct investment. The returns for the indices do not include any transaction costs, management fees or other costs. Investors cannot purchase interests directly in an index. Returns are based on fully discretionary accounts under management and may include terminated accounts. The dispersion of annual returns is measured by the standard deviation among asset-weighted portfolio returns represented within the composite for the full year. Dispersion is not calculated for composites with less than five accounts for the whole period. Derivatives may make up a part of the composite strategy as Logan believes that derivatives offer value and are appropriate investments for client mandates. The Firm may utilize futures, forwards and interest rate swaps to assist in the management of our portfolios. Derivative usage is governed by the appropriate level of risk to meet the return targets rather than for speculative purposes. Past performance is not indicative of future results. The information presented is available for institutional client use only.
