* N/A – Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

** Prior to November 1, 2007, the investment team was part of Delaware Investments and therefore the firm is reporting the percentage of firm assets only for all accounts managed by Logan Circle Partners, L.P.

Performance Disclosures

Logan Circle Partners, L.P. (“Logan” or the “Firm”) is a registered investment adviser. Prior to November 1, 2007, the Firm was part of Delaware Investments and since that date operates independently as Logan Circle Partners, L.P. The track record presented represents the team’s performance at Delaware Investments while it managed the Core Plus Focus strategy from the October 1, 2000 (“inception date”) through the October 31, 2007. From November 1, 2007 (“creation date”) to the present, the performance presented is for the Core Plus Fixed Income Composite that the team currently manages at Logan.

Logan Circle Partners, L.P. has prepared and presented this report in compliance with the Global Investment Performance Standards (“GIPS®”). The Core Plus Fixed Income Composite received a performance exam by Ernst & Young from the inception date until December 2006 while at the predecessor firm. Additional information regarding the Firm’s policies and procedures for calculating and reporting performance returns is available upon request.

The Core Plus Fixed Income Composite seeks to outperform the broad fixed income market by investing in a core of U.S. investment grade bonds supplemented with U.S. high yield bonds and international bonds in both established and emerging markets. The Composite includes all fee-paying portfolios managed on a discretionary basis according to the applicable composite strategy. The Firm maintains a complete list and description of composites which are available upon request.

The Composite has a significant cash flow policy which is applied consistently and within GIPS® standards. The Firm has chosen to remove accounts that have a significant monthly external aggregate cash flow greater than 10%. Aggregate cash flow is defined as additions plus withdrawals over the monthly period. Accounts are removed in the month of the significant cash flow. If the significant cash flow is client directed requiring security liquidation that materially affects account management, the Firm will remove the account the month of security liquidations. The portfolio will be re-included once the portfolio manager has determined the flow has not impacted the management of the account and the account is invested per the strategy. There have been no changes to this policy and additional information regarding the treatment of Significant Cash Flows is available upon request.

The benchmark for the Logan Core Plus Fixed Income Composite is the Barclays Aggregate Bond Index. All index returns presented are provided to represent the investment environment existing during the time periods shown and will not be covered by the future report of independent verifiers. For comparison purposes, the index is fully invested and includes the reinvestment of income. The index is unmanaged and includes the reinvestment of interest and does not reflect transaction costs or management fees and other expenses. Investors cannot purchase interests directly in an index. Returns are based on fully discretionary accounts under management and may include terminated accounts.

The dispersion of annual returns is measured by the standard deviation among asset-weighted portfolio returns represented within the composite for the full year. Dispersion is not calculated for composites with less than five accounts for the whole period.

Performance returns are presented gross and net fees and include the reinvestment of all income and are calculated in U.S. dollars. Gross-of-fees does not reflect the deduction of our investment management fees. Individual client returns will be reduced by investment management fees and other expenses that the account may incur. The investment management fee schedule for Core Plus Fixed Income Composite is 0.35% on the first \$25 million, 0.30% on amounts from \$25 million to \$100 million and 0.25% on amounts over \$100 million. Fees have a compounding effect on cumulative results. For example, if a 1% investment advisory fee were deducted annually from an account that achieves a 10% gross annualized return, the net return would be approximately 8.9% after the deduction of advisory fees. Investment advisory fees are described in Part II of Form ADV. Actual investment advisory fees incurred by clients may vary.

Derivatives may make up a part of the composite strategy as Logan believes that derivatives offer value and are appropriate investments for client mandates. The Firm may utilize futures, forwards and interest rate swaps to assist in the management of our portfolios. Derivative usage is governed by the appropriate level of risk to meet the return targets rather than for speculative purposes.

Past performance is not indicative of future results. The information presented is only available for institutional client use and a one-on-one presentation.
